ninosekeleni.github.io/Portfolio

Creative director, art director and creative strategist, based in Johannesburg.

I'm Creative Lead at Migration, where over the last four years I've led creative for sport, culture and financial-services brands such as Visa, Cricket South Africa and the DP World Lions. I build campaign platforms that run for whole seasons, and today I bring AI into every stage of that work, from the first idea to the finished campaign.

This programme is the short version of my portfolio. The full stories, films and credits are online at ninosekeleni.github.io/Portfolio, and I'm open to creative director and creative lead roles in any industry.

A Moment for More

Visa's Paris 2024 brief was to get Millennials and Gen Z using their cards, so we turned three audience truths into one flexible platform led by sprinter Akani Simbine across TikTok, Meta, in-game media and live activations.

It Starts Here

FNB became the first South African bank to bring the FIFA World Cup 2026 to its customers, launched a year early with a 60-second manifesto film and carried across radio, digital out-of-home, social, direct mail and a Mall of Africa activation.

Identity, events, design and animation for brands across Africa.

○ Judicial Institute for Africa

A brand for African justice

A professional, authoritative identity for the institute that leads judicial training across Africa, with guidelines and templates its own team can use.

● Air France

Decades of Connection

The event identity for a one-night theatrical performance marking 70 years of Air France flights between Paris and Johannesburg, down to a boarding-pass invitation.

● Harmony Gold

Mining with Purpose

Communication for Harmony Gold's Mining with Purpose message, from the results campaign and Mining Indaba speakers to a stark 16 Days of Activism poster series.

● Petra Diamonds

Purpose Statement

A four-film illustrated animation series explaining Petra Diamonds' purpose and culture code, adapted into Swahili for its operations in Tanzania.

○ Migration

Studio website

UX and UI for Migration's studio website, from wireframes to a black full-screen menu built around the studio's M.
